Introduction

Control and special cables, flexible or pre-fabricated lines for various, predominantly mobile and temporary installations. Designed for standard application in commerce, construction and industry.

Whether indoors or outdoors, we provide custom-made solutions that leave nothing to be desired!

Benefits of our system

- large product range in stock
- individual pre-fabricated cables
- completely pre-fabricated cables in stock
- for every application in industry, construction, the garden, etc.
- cable labelling possible

Our services

- individual consultation
- proven product range
- tailor-made, customized solutions
- manufacturing from small to large quantities
- lifetime availability of spare parts
- technical drawing (if required in 3D)
- competent advice on installation

Special options

Colours Gifaflex (page 4)

When purchasing over 500m (unless in the standard range) of one size, the following cable colours are available for a small surcharge:

Grey	RAL7001	Blue	RAL5015	Black	RAL9005
Brown	RAL8004	Green	RAL6010	Orange	RAL2003
Red	RAL3000	Yellow	RAL1021		

Other special cable colours on request.

Colours Euroflex (page 5)

Other colours possible with a minimum quantity of 1'000m.

Customer printing

Cable types Gifaflex and Euroflex can be labelled according to your requirements (e.g. company name, but no logos).

- Free printing:
from 500m (10/16mm² from 200m) per order (max. 3 sizes, assorted)
- Connection and extension cable:
from 30 items per order (max. 3 items, assorted)
- Smaller orders:
Surcharge of 40 Swiss Francs per order

Packaging

Unless otherwise agreed, the cable lengths will be ready-assembled onto 100m rings or wound onto a loan cable drum (depending on the size).

Production lengths

At 500m and more, + / - 10% may be over / under-delivered due to production processes. Delivery in one piece can only be guaranteed on the basis of an additional agreement.

Wire identification

The wire colours have been internationally coordinated since 1 October 2006 (standard HD 308 S2).

HD 308 S2

Gifaflex: The universal, reinforced connection line Cable type CH-N07V3V3-F

Special features

The Gifaflex cable is a heavy, cold-resistant cable, has excellent tensile strength and elongation properties. It has a very good fire behaviour and low depth of impression. This assistance to the chemical effects of acids, weak alkalis and low alcohols. The Gifaflex cable is resistant to atmospheric influences. Thanks to these properties, it can be used as a standard cable of above-average quality.

Applications

Equipment, machine industry/assembly industry/foodstuff industry/transport (e.g. railways)/mechanical workshops/construction sites/agriculture/communal operations. (Use conforming to VDE 0298, part 3)

Technical data

Operating voltage U_0/U : 450/750 V
 Test voltage: 2'000 V – 3'000 V/50 Hz
 Temperature range: –25°C to +70°C, inactive up to –40°C
 Minimum bend radius: $10 \times D$ (D = cable Ø)
 Strand/casing: Cu-flex (VDE 0295 class 5)
 Gifaplast/Gifaplast (special mixture)
 Casing colour: bright yellow RAL1021 (standard) or as required

Customer printing

The cable can be printed with your company name (according to your requirements). For further information, see page 3.

Other dimensions / versions available on request

Euroflex: A very special, high quality connection line (harmonised standard design)
Cable type H07 BQ-F (1mm² = H05)

Special features

The Euroflex cable offers excellent features including high resistance to chemical effects from mineral oils/greases, alcohol-free petrol and kerosene, lakewater/seawater and waste water, microbes and rotting, acids and alkalis. The cable is suitable for contact with food. It is **halogen-free**. Its mechanical load capacity guarantees a long service life. It is also flexible when cold and offers low adhesion. The Euroflex cable also features very good resistance to weather conditions, UV radiation, ozone and oxygen as well as gamma radiation.

Technical data

Operating voltage U_0/U : 1mm²: 300/500V/from 1.5mm²: 450/750V
 Test voltage: 2'000V/50Hz/2'500V/50Hz
 Temperature range: -40°C to +85°C
 Minimum bend radius: 10×D (D = cable Ø)
 Strand/casing: Cu-flex (HD 383 class 5)
 EPR rubber/PUR
 Casing colours: bright yellow RAL1021
 orange RAL2004

Applications

Chemical industry/equipment, machine industry/assembly industry/food-stuff industry/transport (e.g. railways)/mechanical workshops/construction sites/agriculture/communal operations.
 Use: according to VDE 0250, part 818

Customer printing

The cable with dimensions up to 5×16 mm² can be printed with your company name (according to your requirements). For further information, see page 3.

Proflex: Special cable for extremely low ambient temperatures Cable type H07 RN-F (1mm² = H05)

Special features

The outer casing of the Proflex 07 cable consists of mechanically extremely high loading capacity polychloroprene. The structure of the silicone-free cable ensures a high degree of flexibility, excellent resistance to weather conditions, ozone, oil and alkalis, and a high thermal loading capacity. The cable can be used underwater permanently. Also permitted for permanent installation up to 1'000 V.

Technical data

Operating voltage U_o/U : 450 V / 750 V
 Test voltage: 2'500 V / 50 Hz
 Temperature range:
 – moves: –30° C to +85° C
 – inactive: –50° C to +85° C
 – short-term: up to +200° C
 Minimum bend radius: 4 × D (D = cable Ø)
 Strand/casing: Cu-flex (VDE 0295 class 5)
 polychloroprene/polychloroprene (VDE 0207)
 Casing colour: yellow

Applications

In demanding industrial environments / construction sites / tunnel construction / trimming plants / EX area (VDE 0165).
 Use: to VDE 0282-4 and VDE 0282-810 (construction site usage)

Customer printing

The cable can be printed with your company name (according to your requirements).

Titanex: Versatile, universal industry cable

Cable type H07 RN-F (1 mm² = H05)

Special features

The design of the silicone-free cable ensures high flexibility and high resistance to oils and greases, even in an alkaline or acid environment.

Technical data

Operating voltage U ₀ /U:	450V/750V
Test voltage:	2'500 V/50 Hz
Temperature range:	
– moves:	–35° C bis +90° C
– inactive:	–60° C bis +90° C
– short-term:	up to +200° C
Minimum bend radius:	3 - 4 × D (D = Cable Ø)
Strand/casing:	Cu-flex (VDE 0295 Kl. 5) rubber insulation type T14 / Rubber outer sheath type EM2 by HD22, (crosslinked elastomer), (VDE 0282)
Casing colour:	black

Applications

In the area of very extreme mechanical and thermal loads. Agriculture/building sites/trade/fire hazard establishments/sports facilities/event technology/stage and musical performance/temporary buildings/barracks/cooling installations/photovoltaics/steel industry/swimming pool technology/robotics

Equipment connection leads

Special features

- all plugs vulcanized directly onto the cable
- ends cut off to leave a smooth finish; on request and against surcharge dismantled and furnished with conductor sleeves.

Customer printing

The connection leads for cable types Gifaflex, Euroflex and Proflex can be printed with your company name (according to your specifications).

Spiral cable

Technical data

Operating voltage U_o/U : 300/500V to 1.0mm², 450/750V from 1.5mm²
 Test voltage: 3'000V
 Temperature range: -30° C to +80° C
 Strand/casing: PVC/PUR
 Casing colour: orange

Special features

Long-lasting retractive force (even in daily use in tough conditions) characterise these spiral cables. High impact toughness, resistance to acids and alkalis, UV and weather-resistant are other features.

Applications

For robots/drilling machines(screwdrivers and other manual equipment)/high performance machines/hoisting platforms/Lights

Spiral ground cable

Technical data

Operating voltage U_o/U : 450/750V
 Test voltage: 2'500V
 Temperature range: -5° C to +70° C
 Tensile strength: min. 12.5N/mm²
 Elongation at tear: min. 150%
 Casing colour: yellow/green

Special features

This very special spiral ground cable has been developed for equipotential bonding (ground connection). A fine-wire grounding strand (yellow/green) is fed loose into a transparent polyurethane hose. Meeting maximum safety requirements and readiness for use under extreme conditions are the specifications for this product.

Applications

Regulation/measurement/control and lab technology/chemical industry/medicine and electrical engineering/automobile industry/equipment construction/pneumatics and hydraulics/food industry

Size No. of poles×mm ²	Item no.	Strand structure Number×mm	Exter- nal-Ø approx. mm	Turning length mm	Useable length mm

1×6.0	031341	52×0.38	13.0	1'000	10'000

Ready-made spiral ground cable

Special features

For frequently used applications we have produced various standard ready-made options. The grounding tongs and the cable lug used have been carefully selected. The connection points are cleanly and permanently sealed using a shrinkdown hose.

Component fitting start/end	Item no.	Size No. of poles×mm ²	Turning length mm	Useable length mm

Reeling cable

Technical data

Cable:	Conductor of tin-plated copper wires, to VDE 0295, cl. 5
Insulation:	rubber compound
Strand identification:	from 6 strands: black with white numbers
Temperature range:	mobile: -25°C to +80°C
Bend radius:	6.25×D (D = cable Ø)
Operating voltage:	U ₀ /U 600 / 1'000V
Test voltage:	4'000V
Insulation resistance:	> 20MΩm /km
Carrying force:	up to 55 kg (dead weight must be observed)
Casing:	rubber compound colour black

Special features

Optimum-sized device made from natural fibres with high resistance to tearing forms the strain relief and at the same time the neutral core element forms the centre of the cable. With multi-layer cord add-on units, textile dividing layers prevent undesirable adhesion.

- flame-retardant to IEC 60332-1-2
- oil-resistant to EN 60811-404
- high chemical, thermal and mechanical strength
- UV resistance

Applications

- for use in lifting gear, transport and conveyor systems
- in wet and dry indoor areas, outdoors as well as max. 2 weeks continuously in process water.

Size No. of poles×mm ²	Item no.	Strand structure Number×mm	External-Ø approx. mm	Weight kg / 100m
18×1.5	204102	30×0.25	23.9	77.0

Gifaplast-2TY

Technical data

Cable:	strands made from fine copper wire, bare, to VDE 0295, cl. 6
Insulation:	special PVC, T12/Y12, to VDE 0207, part 4
Strand identification:	single colour, consecutively numbered by VDE 0293, with protective conductor
Temperature range:	moves: -30°C to +70°C inactive: -40°C to +70°C with changing bends 12×D (D = cable Ø)
Bend radius:	300/500V
Operating voltage U ₀ /U:	3'000V
Test voltage:	> 20MΩm/km
Insulation resistance:	up to 135 kg absolute non-critical, critical point is at 190 kg (dead weight must be observed)
Carrying force:	PVC, TM2, YM2, to VDE 0207, part 5, colour: yellow

Special features

Gifaplast-2TY is a control lead with two steel cords embedded into the outer casing at the side. The cable therefore has a considerably higher load capacity and is largely free of axial torsion. The tractive forces produced are absorbed by two torsion-free steel cords, connected to the outer coating, parallel to the axis. Gifaplast-2TY has a robust, cryogenic and weather-resistant outer casing.

Applications

In crane and delivery systems on control push-buttons/in steel works/as self-contained shaft cable/in high-rack systems

Size No. of poles×mm ²	Item no.	Strand structure Number×mm	External-Ø approx. mm	Weight kg / 100m
18×1.0	041756	57×0.15	17.0 / 32.0	52.8

Other dimensions / versions available on request

Spiral cable STY-PVC /PUR

Technical data

- Cable: strand made from fine copper wire, bare, to VDE 0295, cl. 5
- Insulation:
- wires: PVC, to VDE 0207, part 4
 - casing: PUR
- Strand identification: wires are blue and numbered consecutively
- Assembly: concentric stranding
- Operating voltage: max. 500V,
- Insulation resistance: > 100 M0hm/km
- Test voltage: wire/wire 3'000 V, wire/shield 2'500 V
- Temperature range:
- moves: –5° C to +70° C
 - inactive: up to –30° C

Special features

The PVC/PUR spiral cable is ideal for special applications in the control, measurement and regulation technology in intrinsically safe systems. The concentric stranding with a static protection shield prevents faults in the transmission area. The poly wool banding guarantees optimum, 100 % protective shield at low and moderate frequencies and filters external electrical faults.

Applications

In damp areas (no external applications)/heating and air conditioning technology/measurement and control leads in machine tool engineering

Size No. of poles×mm²	Item no.	Turning length mm	Freie Enden mm	External- Ø mm	Useable length mm
2×0.75	056377	600	200	6.7	1'800
2×0.75	044836	1'200	500	6.7	3'600

Bulk cable at our camp

Our stock of connection and extension cable

Cable available in different colors

Hospital box according to EN 60601-1

Technical data

Colour: silver anodised
 Dimensions: Housing exterior 400×110×78 mm (W×H×D),
 mass of holes 380×85×8 mm (W×H×Diam.)

Application

In areas used for medical purposes in group 0, 1 and 2
 in accordance to the SN HD 60364-7-710 standard

Product features

- tested according to:
 EN 60601-1 (Medical electrical equipment),
 SN HD 60364-7-710 (Requirements for premises, rooms and instal-
 lations of a special nature – areas used for medical purposes),
 EN 61439-1 (Low-voltage switchgear and controlgear assemblies)
- Protection class IP20
- IP20 socket with hinged cover
- additional potential equalisation
- plug-in and plug-out protection available
- modular accessories available
- aluminium housing with mounting brackets
- corrosion-resistant
- UV-resistant and halogen-free
- resistant to ageing and temperature
- flame retardant

Available on request:

- IP20 socket without hinged cover
- IP55 socket with hinged cover

Item no.	Designation
254431	Hospital box aluminium, 4×T13 (IP20 with hinged cover), 5×Pot. equal., PE+zSPA connected
254432	Hospital box aluminium, 4×T13 (IP20 with hinged cover), 5×Pot. equal., PE+zSPA not connected

Hospital equipment cord set

Technical data

Operating voltage:	450 / 750 V
Test voltage:	2'500 V / 50 Hz
Temperature range:	-40° C to +90° C
Minimum bend radius:	10 × D (D = cable diameter)
External diameter:	10.5 mm
Strand/casing:	EPR rubber/polyether/PUR, black RAL 9005
T12 plug:	vulcanised onto the cable
Equipment plug T113:	vulcanised onto the cable
Branch wires:	vulcanised onto the cable
MC angle plug:	type POAG-KBT 6 DIN, hand-assembled

Product features

- tested in accordance with EN 60601-1 (medical electrical equipment)
- vulcanised connectors on both sides (Schuko/ T113)
- all-round vulcanised branch lines
- resistant double polyurethane casing (polyether/PUR)
- two functions in one cable
- concentrically fitted potential wire
- no concealed slots/notches
- exceptionally flexible round cable
- maximum flexibility grounding wire 4 mm²
- very short cleaning time
- 100% free of silicone and latex

Description

The GIFAS hospital equipment cables have been specially designed for hospitals with operating rooms and intensive care stations. It connects electrical equipment to the power source and also offers equipotential bonding with the grounding strand carried. With the concentrically fitted strand, the PUR cable remains exceptionally flexible.

Item no.	Designation
133036	GIFAS hospital equipment cord set, black, 2.5 m 3×1.5 mm ² + 4 mm ² , POAG, plug T12, connector T113

Cable crossover SMART for cable max. Ø 30 mm

Cable crossover MICRO for cable with max. Ø 30 mm

General

For many years, has a range of GIFAS cable bridges in the offer. This range was in this period expanded and improved to such new needs of the buyer's marked needs. Today, cable bridges meet the highest standards and have become accepted as the standard for big gatherings and events. Other applications include installations in industrial applications, and mobile sectors, construction companies and emergency services.

Highest quality

All GIFAS cable bridges are made of polyurethane in the fire protection class B2 (according to DIN 4102) and thus oil, acids, and gasoline resistant. The operating range is -40°C to $+70^{\circ}\text{C}$. The Shore hardness is $88 \pm 4\text{A}$. GIFAS cable bridges in accordance with EN 61537:2007; (IEC 61537:2006) in accordance with the provisions of Directive 73/23/EEC (Low Voltage Equipment).

Customer printing

The cable bridges from 30 pcs. be printed with your company name/logo (as per your instructions).

Technical data

Material lower section: polyurethane, black
Material lid black: polyurethane, yellow
max. load: app. 2'000 kg / 400 cm²
Length: 1'000 mm
Width: 290 mm
Height: 48 mm
Channels: 3 channels
Weight: 5 kg

Technical data

Material lower section: polyurethane, black
Material lid black: polyurethane, yellow
max. load: ca. 2'000 kg / 400 cm²
Length: 1'005 mm
Width: 273 mm
Height: 48 mm
Channels: 2 channels (35×30 mm)
Weight: 5.5 kg

Special features

The smallest of the big. Easily and universally applicable. The cable bridge SMART fulfils all expectations of a professional cable protection and extends the range GIFAS a compact, very lightweight (only 5 kg), but passable cable bridge in the familiar black/yellow design.

Special features

- non-slip and step-resistant 3D LaserGrip® surface
- ergonomic design for even better accessibility by vehicle and by foot
- patented self-cleaning hinge and convenient locking system
- made of extremely robust and shatterproof TPU

Item no.	Designation
032295	Cable crossover SMART 3 channels, 290×48×1'000 mm (W×H×D)
109667	End ramp with groove
109668	End ramp with plug

Item no.	Designation
207953	Cable crossover type MICRO 2-channel 273×48×1'005 mm (w×h×l)

Cable crossover MIDI
for cable max. Ø 34 mm

Technical data

Material lower section:	polyurethane, black
Material lid black:	polyurethane, yellow
max. load:	app. 2'000 kg/400 cm²
Length:	890 mm
Width:	542 mm
Height:	52 mm
Channels:	5 channels
Weight:	12 kg

Special features

The MIDI cable bridge was designed as a solution to the cable bridge between applications and the type COMPACT STANDARD. 5 channels, a lower height and lighter weight molded connectors, and features of this cable bridge.

Item no.	Designation
016031	Cable crossover MIDI 5 channels, 542×52×890 mm (W×H×D)
020840	Curve 45° for MIDI (incl. 1 pair connecting pin)
020841	End ramp for MIDI

Cable crossover DEFENDER 3 2D
modular, wheelchair accessible

Technical data

Material lower section:	polyurethane, black
Material lid black:	polyurethane, yellow
max. load:	approx. 5'000 kg/750 cm²
Dimensions (l×w×h):	
– Item no. 224766:	1'000×330×73 mm
– Item no. 242888:	500×330×73 mm
– Item no. 224767:	1'000×600×71 mm
Channels:	3 Channels
Cuct height (H×B):	2x: 52×49 mm/1x: 45×50 mm
Weight:	
– Item no. 224766:	13.5 kg
– Item no. 242888:	6.75 kg
– Item no. 224767:	15.9 kg

Special features

- patented self-cleaning hinges
- fire protection class E according to DIN EN 13501-1
- very stable, tear-resistant and 100% recyclable plastic
- resistant to oil, petrol and short-term contact with solvents
- hardness range 88 Shore-A ± 4
- high-strength all-round cable crossover with 3D laser grip anti-slip surface of black, recycled polyurethane
- yellow recyclable polyurethane cover with high warning effect
- simple, multi-directional modular design with unlimited width and length expandability

Item no.	Designation
224766	Cable crossover DEFENDER 3 2D, 3 channels modular system, middle part, 1'000×330×73 mm
242888	Cable crossover DEFENDER 3 2D, 3 channels modular system, middle part, 500×330×73 mm
224767	Ramp for cable crossover DEFENDER 3 2D modular system, 1'000×600×71 mm

Cable crossover STANDARD

for cable max. Ø 49 mm

Technical data

Material lower section:	polyurethane, black
Material lid black:	polyurethane, yellow
max. load:	app. 5'000 kg / 400 cm ²
Length:	1'000 mm
Width:	600 mm
Height:	73 mm
Channels:	3 channels
Weight:	22 kg

Special features

The cable bridge STANDARD, made of black polyurethane with textured anti-slip surface and a striking yellow polyethylene cover combines three cable channels. The cable bridge can connect to each other by means of pins available separately. Each of the cable bridge is already supplied with a pair of connecting pins mounted. The lid with a patented hinge will only be open at the cable entry. The integrated zipper technology combines improved protection against dirt and/or tearing as opposed to conventional systems Velcro. A complete range of accessories extends the type STANDARD in a flexible system for protection of expensive cables and multi core.

Item no.	Designation
059553	Cable crossover STANDARD, 3 channels, 600×73×1'000 mm (W×H×D)
059554	End ramp for STANDARD
018359	Curve 45° for STANDARD (incl. 1 pair connecting pin)
059556	Connecting pin for STANDARD

Cable crossover MAXI

for cable max. Ø 62 mm

Technical data

Material lower section:	polyurethane, black
Material lid black:	polyurethane, yellow
max. load:	app. 5'000 kg / 400 cm ²
Length:	700 mm
Width:	696 mm
Height:	87 mm
Channels:	5 channels
Weight:	21.4 kg

Special features

From suggestions from industry and large companies hire the flagship series of cable bridges was developed. 5 oversized cable channels, two of which are suitable for C-types of fire hose (Ø 62 mm). Power cables also find an optimal protection.

Item no.	Designation
023212	Cable crossover MAXI, 5 channels, 696×87×700 mm (W×H×D)
023213	End ramp for MAXI

Cable crossover COMPACT

for cable max. Ø 28 mm

Technical data

Material:	polyurethane, black
Length:	805 mm
Width:	435 mm
Height:	37 mm
Channels:	7 channels
Weight:	3.6 kg

Special features

The Cable COMPACT is the lower cost alternative to the STANDARD and MIDI version. In the ground shaped rows of knobs allow a variety of cables under the cable bridge and ensure to carry the weight of crossing pedestrians. It is not suitable for driving over with cars.

Item no.	Designation
019628	Cable crossover COMPACT, 7 channels, 435×37×805 mm (W×H×D)

Hose bridges

for 2B = 75 mm

for 2C = 52 mm

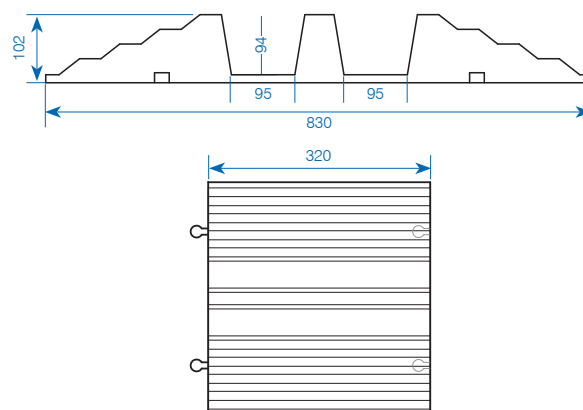

Technical data

Material:	solid rubber, black
Length:	320 mm
Width:	830 mm
Height:	102 mm
Channels:	2 channels
Weight:	15 kg

Special features

The hose bridge made of solid rubber is slip resistant and provides a 2-channel system for the recording of two B-or C-2 tubes. The ramp levels are marked in yellow. The laterally intermeshing connection webs are also used as carrying handles. By connecting the individual segments of any extension of the track width is possible, so that they can also be accessed by truck. The high load capacity is designated and approved up to 40t load.

Item no.	Designation
203954	Hose bridge solid rubber, 2 channels, 830×320×102 mm (W×H×D)
