

Project: Main square in front of the House of Parliament in Berne

Client: Swiss Confederation
Planning: Energie Wasser Bern, 3001 Bern
Executive company: Gasser + Bertschi Elektro AG, 3000 Bern

Task

In order to provide future festivities with the necessary electrical power, there were established adequate solutions in cooperation with the builder, planer and electrician to sort out the problems given.

The redesign of the main square in front of the house of Parliament in Berne had to meet several requests:

- redesign into a pedestrian zone – a meeting point!
- multifunctional positioning – for events – concerts, ceremonial acts
- global concept for a huge amount of public with integrated fountain

Conclusion: Great visual impact and discrete multiple shift usage of our main square in Berne, was the main purpose of this project!

Special features

- The final product is extremely unobtrusive – can be extended quickly and easily!
- Individually equipped with all necessary electrical sockets, fusing and personal protection on-site – simple plug and socket connection system for a multitude of different consumers!
- Equipped with different microphone, audio and video plug-in connections. Can easily be installed through radio- or television technicians.
- Various combinations possible with several underfloor distribution systems.
- For festivities, television broadcast, political or social events.

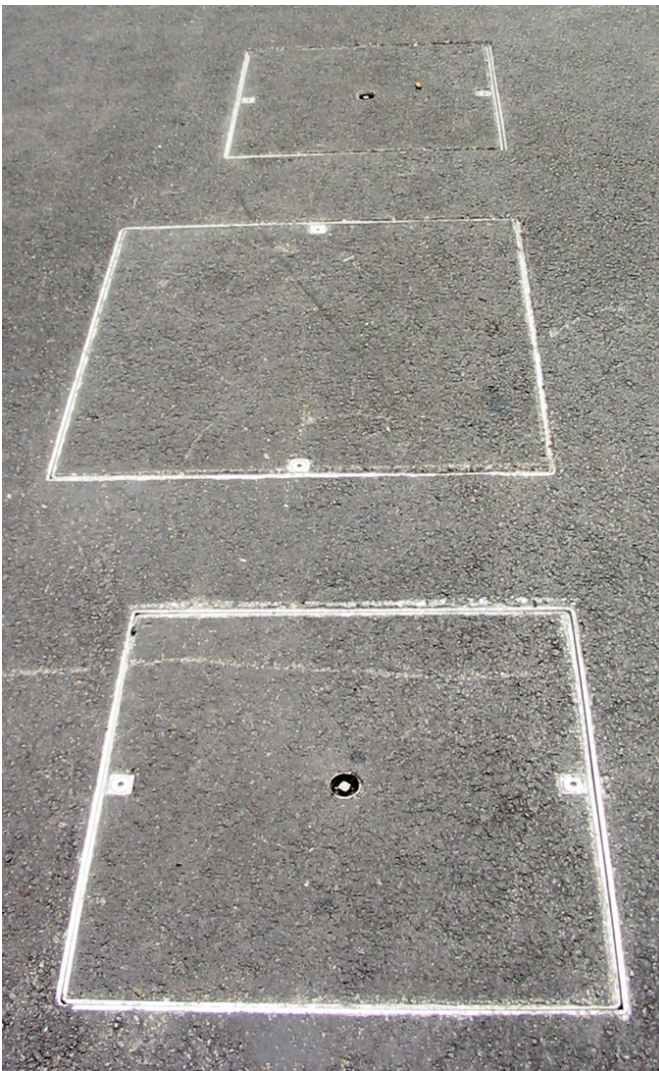

Flexibility is a mandatory regulation!

simple and quick – Power wherever needed!

Telescopic, gas spring supported underfloor distributor system
