

Hard-rubber cable reel for fire-fighting application

Optimum safety in the event of an emergency

Customer / installation engineer:	Several fire brigades all over Switzerland
Requirement:	Cable reels for toughest application by fire brigades civil protection or by armed forces
Solution:	Robust, impact resistant and double-insulated cable reels made of hard rubber
Item no.:	083568 and others in various versions
Areas of application:	fire brigade, civil protection, army, technical assistance organisations or also in industry and in building industry

Starting situation

In case of disaster operations (fires, floods, natural phenomena), cable reels are needed which are ready-to-use at any time. These criteria play a crucial role in the armed forces as well.

Electrical safety is of crucial importance. The protection against electric accidents in extreme conditions at all weathers is essential. On account of the extremely massive construction and the use of high-quality components, it is possible without difficulty to drive over the cables with heavy devices.

Customer benefits

- wide range available from stock
- individual fitting options possible; all cable reels with thermal protection
- all individual parts are available as spare parts for maintenance/repairs
- heavy and robust hard-rubber version – double-insulated
- wide range available
- individual and personal consultation by our sales team
