

Le Pâquier station shown in a new light thanks to GIFAS lighting systems

Accent lighting makes the station shine in a new splendour

Customer/installation engineer:	Groupe E Connect SA
Requirement:	Illumination of the station
Solution:	VisuLED HOME/AlphaLUXX/LaneLED WALL
Article:	860107/800094/860539 - 860540
Quantity:	11 x VisuLED HOME / 2 x AlphaLUXX 60W/9m LaneLED WALL
Areas of application:	Facade lighting, accent lighting

Starting situation

The station in Le Pâquier is located in the village centre and has been completely refurbished and shown to advantage by the lighting. Selection of the right lighting was crucial, so that the black façade does not absorb the light. Furthermore, the illumination should not disturb motorists, train drivers, neighbours or animals.

Our LaneLED Wall, VisuLED Home and AlphaLUXX lighting systems enabled us to find the perfect combination to illuminate the station in the best way possible without a loss of light.

Customer benefits

- less power consumption at very high utilization ratio
- state-of-the-art LED technology
- maintenance-free
- preparation of Relux calculations and sampling on site
